

Chilco

Traditional design, modern look and smooth performance

Chilco

Chilco shown with yellow deck & hatches, burnt orange fade, red seam with a white hull

Superb efficiency and responsiveness

The Chilco has a multi-chined, low-rocker hull for high speed and effortless tracking. Well defined chines allow the kayak to have a relatively small wetted surface and solid stability for edging turns. The shallow "V" of the hull makes this lightweight expedition kayak stable while at rest or underway.

The acceleration and forward speed is very fast. Easy rolling and low wind resistance in adverse conditions are a result of the Chilco's low profile. The ergonomic cockpit design allows easy entry and it's thigh braces accommodate a variety of paddler sizes.

"I just had to say that I have seen your boats and the QUALITY/DESIGN is outstanding! Your web site is equally well done. It's great to see a manufacturer this day and age so focused on commitment to quality. Congratulations! Keep on building those elegant boats."

Gary Leavens, Que, Canada
