

Passat G3

Fun expedition kayak

Passat G3

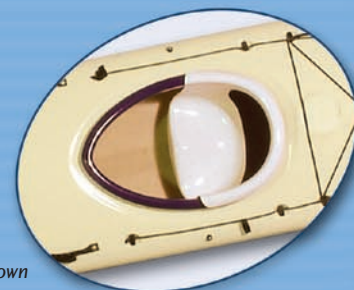

Passat G3 shown with yellow deck, red hatches, mandarin seam and a white hull.

A speedy, high capacity touring kayak

The original Passat hull, acclaimed by adventure racers, is unchanged. A slight increase in overall depth, an increased spread of cockpit locations and curved bulkheads for maximum storage creates a true 3 hatch (3 cockpits with optional seat) expedition tandem. The Passat G3 is stable, edges easily and can tour at 5 knots. It is safe, strong and seaworthy even in challenging waters. This kayak's Greenland style bow, sleek graceful lines, solid feel and expedition capacity make a combination of speed, comfort and storage that is unrivalled in a touring double / triple.

"We used the Passat G3 while instructing a guide training course and enjoyed it immensely. The outfitting was comfortable and the centre hatch is great. It is stable yet very fast and fun to paddle."

Michael Pardy, www.skils.com
