Stable, large volume touring double

The Southwind provides families as well as rental and tour operators with a stable touring double. The spacious cockpits comfortably accommodate paddlers of all sizes. Large middle and rear hatches make this kayak easy to load and creates roomy compartments for children and pets to ride in. The distance between the cockpits allows for non-synchronized strokes. With ample storage capacity the Southwind can hold an abundance of gear for extended expeditions. An optional sail rig and swing keel can be installed converting this double into an exciting sailing kayak.

The Southwind has quickly become an industry standard for expedition doubles in rental and tour fleets.

"I have been the proud owner of a Seaward Southwind Kayak since the fall of 1993. I have enjoyed my double kayak immensely. My Seaward Kayak is one of the best purchases I have ever made."

Bob Denesiuk, BC, Canada
