

Vision

Maneuverable with volume

Vision shown with yellow deck & hatches, burgundy fade & seam with a white hull

Enhanced volume for the intermediate and expert Paddler

Seaward's Vision is our highest volume expedition kayak. Based on our highly popular Navigator model we have taken the "V" out of the hull, added additional hull rocker for increased maneuverability and increased the volume in the bow for extra buoyancy while surfing into your favorite beach. This kayak also features ample storage capacity & a roomy cockpit to ensure there is enough space for all the creature comforts during your ultimate excursion. 🐟

"WOW! You have the very best boats.

Today I was able to paddle my new Vision for a couple of hours here in the San Francisco Bay area. The boat handled very well and is very comfortable. The paint job is awesome! I knew it was going to look good, but it turned out Beautifully!!! I can't say enough about the quality of workmanship and the attention to detail that you guys display."
